

# USP DATA LABS

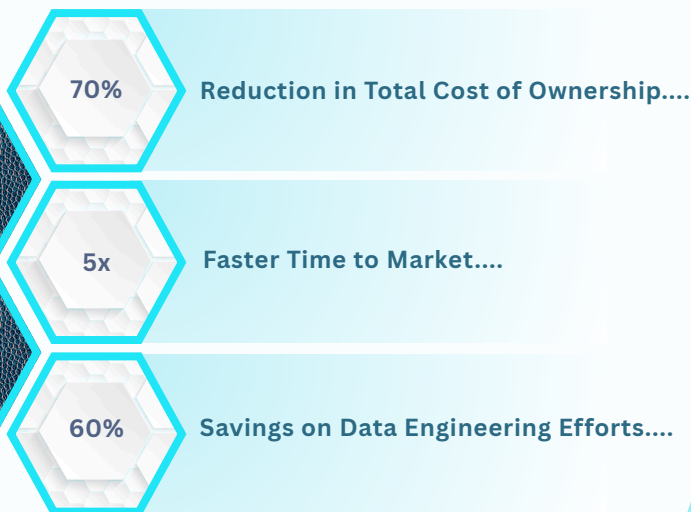

Activate the Intelligence Behind Your Data-powered Enterprise

## About USP Data Labs

A unified automation layer for productization of Data & AI. It evolves beyond the point solutions of fragmented data & analytics tooling to build metadata driven products within weeks instead of months.

### WE AUTOMATE WHAT OTHERS STILL ENGINEER....

From Raw Data to Intelligent Products Instantly!

## ETL REIMAGINED

From Migration to Monetization

### Migration Made Zero Code & No-Deploy

Data Migration from On-prem to Cloud in record time – no code, no pipelines, no staging.

### Visual Modeling with Smart Transforms

Easily transform data using version-controlled design layers, and flexible Universal Query editor

### Zero Code Orchestration & Monitoring

Schedule, run, monitor, and debug pipelines with zero DevOps - incident alerts, auto-retries, email triggers, and built-in lineage

## THE DATA PRODUCT OS LAYER

### DATA MARKETPLACE

Central hub for internal and external data product sharing, powered by auto-generated APIs and access controls

### SAAS - IN - SAAS

A no-code app delivery engine that lets business users build and launch applications without separate infra and code requirement

### GEN AI AGENT BUILDER

Configure, ground and deploy Gen AI apps leveraging built-in RAG engine, integrate with any LLM

### ONEOPS: GOVERNANCE & TRUST

Fine-grained access control (field-level, role-based), Audit trails, lineage, and data trust scoring with no-code operational workflows
